Profile

Senior Computer Engineering student with corporate experience in backend, full-stack, and cross-platform mobile development. Hands-on experience with AWS cloud architectures, Agile/Scrum, and AI-assisted software development.

Education

October 2022 - July 2026

MEF University - Computer Engineering

- GPA: 3.34 / 4.00

Experience

August 2024 - September 2024

Mintyfi Software Technologies – Software Development Intern

- Developed a backend-focused project using Spring Boot
- Designed and implemented authentication, authorization, and database integration features

February 2025 - June 2025

MEF University – Student Assistant for Programming Studio

- Assisted students in understanding and implementing algorithms for course projects
- Provided technical support during lab sessions and project development

May 2025 - August 2025

Freelance Software Development (Remote)

- Contributed to ASP.NET and React web applications for Kompitürk Bilgisayar
- Worked across both frontend and backend development tasks

August 2025 - September 2025

Zorlu Holding – Software Development Intern

- Contributed to web applications used across Zorlu Holding companies by thousands of employees
- Implemented features using ASP.NET, React, and Razor (CSHTML), with basic interactions with Microsoft Azure

October 2025 - November 2025

Social Office – IT Intern (Remote)

- Developed projects using Python, AutoCAD, Photoshop, and Microsoft Excel

January 2026 - June 2026

Turkcell – Software Development Intern

- Developed features, fixed bugs, and wrote unit tests for BiP using React Native
- Developed TypeScript features for a BiP log analysis tool
- Worked in an Agile/Scrum environment using Jira, Confluence, Bitbucket, and Git

Competitions

TEKNOFEST - Tourism Technologies Competition

- Co-designed and developed a virtual tourism game
- Reached the national finals as one of the top 40 teams among hundreds of applicants

Certifications & Training

- **AWS Academy:** Cloud Architecting (60 hours), Cloud Foundations (20 hours)

Skills

- **Programming:** Python, C#, Java, SQL, TypeScript, JavaScript
- **Frameworks & Data:** ASP.NET, Spring Boot, React, React Native, PostgreSQL, REST APIs
- **Cloud & Tools:** AWS (EC2, Lambda, API Gateway, DynamoDB, SNS, CloudWatch), Azure (basic), Docker (basic), Git, GitHub, Bitbucket
- **AI & Workflow:** Prompt engineering, AI-assisted development (ChatGPT, Codex, Claude), Agile/Scrum, Jira, Confluence, OOP, unit testing, English (fluent)

Interests

- Fitness, sim racing, motorsports, and music
